

XM Radio delivers to my home, my car, and my office the BEST in music, news, sports, comedy etc . It does so affordably and with high quality service. When traveling into Phoenix from our small town.. XM Traffic/Weather increases our safety during flash floods, traffic accidents, and seasonal weather. I PAY for this excellent service and find it disconcerting that NAB is trying to stop XM from providing it to US... the PAYING XM Subscribers who choose not to listen to NAB stations.

XM Radio not only provides the BEST in music programming available today... but with it's Traffic/Weather it is providing a public service ... SAFER roads and highways!

I challenge each FCC board member...get out there in the middle of rush hour, turn on XM's Traffic station and try it out! Compare that to your favorite NAB channel. You'll say NO to Petitionn 04-160.
